- NESHTA - National Environmental, Safety and Health Training Association (2012)
- NFPA - National Fire Protection Association (2007)
- NSC - National Safety Council (1994)
- SFPE - Society of Fire Protection Engineers (1984)

BCSP: Credentialing Leader

- History of excellence
- Exceptional standards of governance
- Integrity in exam process
- International recognition
- Maintains highest standards of accreditation
- 50,000+ active certifications/designations in 108 countries

What is Certification?

Certify – to attest authoritatively as meeting a standard.

Webster's Ninth Collegiate Dictionary

- Professional credential
- Competency assessment
- Third-party validation of the four 'E's
- Voluntary process
- Evaluates individuals against a standard
- Requires continuing education and professional development (recertification)

What is Certification? (continued)

It is NOT:

- License to practice
- Permanent
- Membership
- Certificate of completion

Certification	Certificate
Results from an <u>assessment</u> process	Results from an <u>educational</u> process
Typically requires some amount of professional experience	For newcomers and experienced professionals alike
Awarded by a third-party, standard-setting organization	Awarded by a training and educational programs or institutions
Indicates <u>master/competency</u> , as measured against a defensible set of standards, usually by application or examination	Indicates <u>completion of a course</u> or series of courses with a specific focus
Typically results in a designation to use after one's name	Usually listed on a resume detailing education
Has <u>on-going requirements (recertification/continuing education)</u> to maintain; holder must demonstrate he/she continues to meet requirements	Is the <u>end result</u> ; individual may or may not need to demonstrate knowledge of course content at the end of a set period of time

Why is Certification Important?

- Demonstrates competency
- Advances safety professionalism
- Competitive advantage
- Demonstrates credibility
- Sets standards
- Pay and mobility
- Contract Qualifications

Reasons to Become Certified

ASSP PDC 2019 Lightning Poll

Salary Survey 2018

- Joint effort led by BCSP and American Society of Safety Professionals (ASSP)
- 10,282 responses
- Median annual base salary: \$97,000

Findings:

- Certified SH&E professionals typically earn \$20,000 MORE per year than those with no licenses or certifications
- CSP is higher: \$30,000 more per year*

<http://www.bcsp.org/SH-E-Practice/Salary-Survey>

*compared to their colleagues that perform similar functions but do not hold the CSP

What is Accreditation?

Accreditation — the formal recognition by an independent body, generally known as an accreditation body, that a certification body operates according to international standards

International Organization for Standardization (ISO)

Why it's important:

- Protects integrity of individual certification programs
- Ensures validity of certifications' development and revalidation
- Enhances authority of certification body
- Promotes public confidence in the competence of individual certificants

Accreditation Assures

Governance

- Nominations/elections
- Peer participation
- Public participation

Financial disclosure

- Stability and financial condition
- Budget details

Fairness to candidates

Examinations

- Validity
- Reliability
- Passing scores

Recertification

Independence from preparation

Management systems

Not all Accreditations are Created Equal

- Content of standards
- Evaluators of applications
- Training of evaluators
- Depth of evaluation

Accreditation Organizations for Personnel Certification Bodies

Accrediting Body	Accreditation Standard	SH&E-related certifications*
American National Standards Institute (ANSI)	ISO/IEC- 17024	15

*refers to certifications that are accredited by the body and to the standard represented in its corresponding row

Accredited vs. Non-Accredited Certifications

300+ Safety Certifications Available

Total Accredited SH&E Programs by ANSI: 15

8 of the 15 are BCSP's!

- Certified Safety Professional (CSP)
- Safety Management Specialist (SMS)

BCSP Certifications

Certified Safety Professional®

Associate Safety Professional®

Safety Management Specialist®

Occupational Hygiene and Safety Technician®

Construction Health and Safety Technician®

Safety Trained Supervisor®

Safety Trained Supervisor Construction®

Certified Instructional Trainer

Four Types of Certification

- Professional
- Management
- Technician and Supervisory
- Training

Professional Certifications and Designations

Safety Management Certification

Safety Management Specialist

Validates the experience of safety practitioners with more than 10 years of experience, with or without a college degree

Technician and Supervisory Certifications

Occupational Hygiene and
Safety Technician

Safety Trained Supervisor

Construction Health and
Safety Technician

Safety Trained Supervisor
Construction

SH&E Training Certification

Certified Instructional Trainer

BCSP offers an SH&E Trainer certification that provides additional career paths to professional trainers.

Active Certifications

CSP	20,231
SMS	1,416
ASP	5,926
OHST	1,989
CHST	8,384
STS	2,499
STSC	7,112
CIT	888
GSP	6,237
TSP	734

Safety Culture

BCSP fulfills industry and global demand for validating highly competent safety practitioners with varying amounts of formal education and significant amounts of experience.

BCSP certifications create a unified safety culture by setting baseline competencies of safety knowledge and skills throughout the organization.

The best safety cultures require safety competency across the organization and also value safety leadership at all levels.

Application Fee Waivers
